HIMALAYAN SALT STONE
ORIGINAL STONE

HIMALAYAN SALT STONE
ORIGINAL STONE

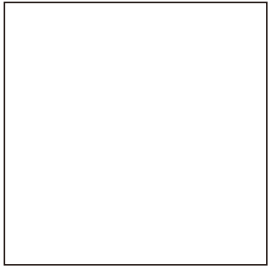

Il sale dell'Himalaya è il sale minerale più bello del mondo. Un gran numero di oligoelementi viene prodotto a causa dell'estrusione e della collisione delle formazioni rocciose della crosta terrestre. Quando l'acqua del mare evapora, il liquido salino denso viene pressato sotto la crosta terrestre. Dopo un lungo periodo di gestazione geologica, forma il salgemma cristallino simile al cristallo.

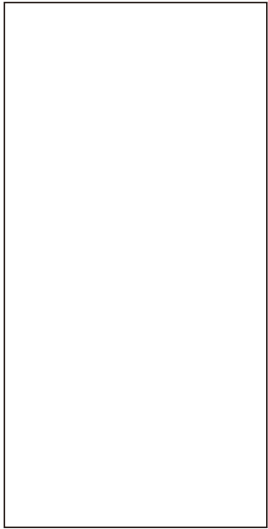

Casaferro[®]
Porcelain. Elegance. Sustainability

Himalayan Salt is the most beautiful mineral salt in the world. It is a large amount of trace elements produced by the squeezing and collision of the earth's crust. When the seawater evaporates, the thick salt liquid is pressed under the earth's crust. After a long geological gestation, it forms crystal-like crystalline rock salt.
